A dedicated Front-End Developer seeking a challenging position that will allow me to utilize my technical skills. I am confident in my ability to producing exceptional work that meets and exceeds the expectations of your organization's needs. Proficiency in creating responsive and user-friendly web applications, with ability in creating interactive and engaging UI. I have a passion for continuously improving my skill set and committed in delivering high-quality web solutions. I am excited about the opportunity in contributing my skills and expertise to your team to help achieve organizational goals.

PROFESSIONAL EXPERIENCE

Front-end Developer @Aptagrim Limited

August 2022 - Present(2023)

I possess extensive experience across diverse projects, encompassing the development of HRMS product and contributions to DRDO India. My portfolio extends to client projects covering Housing, USB-blocker, the Company's Official website, and Energy solutions. Support roles on various projects, demonstrating flexibility and the ability to adapt to different scopes and requirements. Notable works are as follows:

- **DRDO Project:** Collaborated actively with a skilled team on a project commissioned by India's DRDO's R&D lab, Centre For Air Borne System (CABS). Took an instrumental role in developing a cutting-edge surveillance application using STK engine, LabVIEW, and sophisticated hardware. This application aimed to monitor and track missiles, jets, and various objects across different terrains—land, air, and water, underscoring a passion for impactful and mission-critical projects.
- **Psyhire Product Development:** I was an integral part of the team involved in the development of "Psyhire," the upcoming 3.0 version of our main product, AptahR. My responsibilities included working on key features such as the candidate application process, skill assessment functionality, the external career application, and the configuration settings for career management. These contributions are fundamental to ensuring the product's readiness and user-friendliness as we progress towards its release.
